Cairo, Egypt | +201150606405

Frontend Developer skilled in React, Next.js, and Tailwind CSS. Experienced in building fast, accessible, and user-focused web applications. Passionate about performance, scalability, and turning complex ideas into intuitive, impactful interfaces

## Work Experience

### Frontend Developer
*Nua Security* | *KSA*

Jan 2025 - Present

Built responsive landing pages and contributed to AI-driven cybersecurity tools using Next.js, Tailwind CSS, and LangGraph. Focused on frontend performance, authentication, and integration of CopilotKit, NextAuth, and Keycloak for secure, modern user experiences.

- Developed marketing landing pages using Next.js, Tailwind CSS, and Lottie-react.
- Collaborated on AI cybersecurity agent using LangGraph, CopilotKit, and Next.js.
- Implemented secure authentication flows with NextAuth and Keycloak.

### Frontend Developer
*Trustline* | *KSA*

Oct 2022 - Dec 2024

Developed and maintained the Trustline platform using Next.js, Redux, and Bootstrap. Built dashboards, implemented authentication, optimized SEO, and integrated analytics. Focused on delivering high-performance, user-friendly experiences with clean, tested, and scalable code.

- Built trustline.sa and user dashboards using Next.js, Redux, Bootstrap, and Recharts.
- Implemented authentication and integrated Google Analytics & Tag Manager for tracking and SEO performance.
- Wrote unit and integration tests with Jest and React Testing Library to ensure application reliability.

### Frontend Developer
*Information and Decision Support Center (IDSC)* | *Cairo*

Apr 2020 - Sep 2022

Developed responsive, accessible web applications and dashboards using JavaScript, jQuery, React, and Bootstrap. Contributed to ERP and knowledge systems while translating UI/UX designs into clean, user-friendly interfaces with strong focus on usability and data visualization.

- Collaborated on building internal ERP and knowledge systems with JavaScript, jQuery, React, and Bootstrap.
- Developed dashboards with interactive charts for data analysis and decision-making.
- Translated UI/UX designs into responsive, accessible interfaces aligned with modern frontend standards.

Frontend Intern                                              Sep 2019 - Mar 2020
*Teqneia* | *Cairo*

> Completed a 6-month internship contributing to the development of the company's main platform and a recruitment system. Gained hands-on experience collaborating with the engineering team on real-world frontend projects and UI implementation.

## Projects

### WeCare                                                   Apr 2022 - Jul 2022

> WeCare is a service and e-commerce web application offering customer-focused solutions in health, insurance, and facility management. The frontend was built using React.js, Redux, Bootstrap, and FullCalendar to deliver a responsive and user-friendly experience.

### Cairo Opera House Website                                Aug 2022 - Oct 2022

> Developed the official website cairoopera.org, delivering a modern, accessible platform for showcasing cultural events, performances, and ticket information. Focused on performance, responsive design, and user experience to serve a wide public audience effectively.

### Agriprice                                                Jan 2021 - Mar 2021

> A web application that displays monitored local and international commodity prices. The frontend was built using React.js, while the backend was developed with ASP.NET Core, ensuring a responsive and data-driven user experience.
